

Speed... Endurance... Technology...
This is the world of Le Mans, the historic 24-hour event that set the standard for racing excitement.

Dance51.com presents "Speed Tribe," an award-winning cinematic and musical journey through one of the most grueling events the world has ever known.

The DVD features MTV-style films with exclusive footage and 3-D animation, edited and set to electronic beats and soundscapes that push the limits of 5.1 surround sound. A companion CD provides a re-scored and re-mixed soundtrack for an alternative listening experience.

"Speed Tribe" was created by legendary electronica producers Daniel Bressanuti and Patrick Codenys (Front 242), and digital filmmakers Rod Chong and Sharon Matarazzo. Whether you are a racing enthusiast, electronic music fan or home theater afficiando, "Speed Tribe" is a must-have for any DVD collection.
